## DISCLAIMERS

All measurements in millimetres.

Colour representation of product is accurate as possible.

Samples of product shown are intended to indicate general quality and colour only.

As products are made from natural resources, variations may at times occur in colour and texture.

Diamond cut pavers, bullnosing and pool surrounds are recommended to have a minimum of two coats of approved solvent base sealer.

Product dimensions shown are nominal only. Actual manufactured size will vary between production runs and product types.

Paving installation according to standard building practices in Australia require that a 2-4mm joint between pavers, as clean jointing sand is to be swept in between pavers to ensure bonding. If compacting is required do so lightly with a plate compacter fitted with carpet or plywood.

Some chipping and breakages may occur during the delivery, off loading and laying of blocks and pavers. It is recommended that this product be used for cuts and infills. This should not exceed 5% after job completed.

Any complaints regarding product should be directed to the place of purchase prior to laying.

All prices quoted will be held for 30 days only.
